

HEALTH SAFETY PROTOCOLS

Effective August 11, 2021

Deermeadows follows CDC guidelines in developing health safety protocols for our campus. We also consider current transmission levels of COVID in our area and seek counsel from our Medical Advisory Team.

Deermeadows employees, regardless of vaccination status, will wear a mask on campus indoors when around other people. This aligns with the most recent mask guidance from the CDC.

We encourage everyone to take steps recommended by the CDC and health care providers to protect the health safety of others including:

1. Wear a mask
2. Wash hands frequently
3. Stay home when ill
4. If exposed to COVID or if you contract COVID, please contact your healthcare provider for quarantine guidance

Within our Worship Center, we have two sections (far right and far left) that have every other row closed to facilitate physical distancing for those who desire it.

If you are sick or are not comfortable being on campus, we invite you to participate in our worship service on Sunday morning at 10:15 via livestream. We also have Zoom options for several Sunday morning Connect Groups. The Wednesday night pastoral Bible study in Founders Hall is livestreamed on Facebook Live.

New Update: Beginning August 15 through the month of September, we are asking all adult leaders who work with children age 12 and under to wear a mask when around kids. We will reevaluate at the end of September. We appreciate these leaders taking this step to protect the health of children who cannot be vaccinated.

Thank you for your faithfulness through the difficulties of the pandemic.
